Kitepost Self-Serve Pricing Policy

Version 1.0, approved after the self-serve pricing review. Owner: Priya (Product).

This policy sets the self-serve plans, included shipments, overage, billing terms and the launch plan for Kitepost shipment tracking. Sales, billing and support must quote these terms.

Contents: 1 Plans. 2 Starter. 3 Growth. 4 Enterprise. 5 Overage. 6 Annual billing. 7 Usage meter. 8 Taxes. 9 Refunds. 10 Support. 11 Launch plan. 12 Worked examples.

1. Plans at a glance

Kitepost offers three plans. Starter and Growth are self-serve and billed monthly or annually. Enterprise is sales-led and priced per contract.

Starter: Rs. 4,999 per month, 1,500 shipments included.

Growth: Rs. 14,999 per month, 10,000 shipments included, WhatsApp delivery updates, two warehouse locations.

Enterprise: custom pricing, three or more warehouse locations, dedicated support.

2. Starter plan

The Starter plan costs Rs. 4,999 per month and includes 1,500 tracked shipments each month.

Starter is designed for small shippers moving up to about fifteen hundred parcels a month. Shipments above the included amount are billed as overage (section 5).

Starter includes one warehouse location, email delivery updates and the standard dashboard.

Margin note from Finance (Rahul): a busy Starter account runs at about 46 percent margin at this price.

3. Growth plan

The Growth plan costs Rs. 14,999 per month and includes 10,000 tracked shipments.

Growth adds WhatsApp delivery updates and supports two warehouse locations.

Accounts that need three or more warehouses, such as Monsoon Apparel, move to Enterprise rather than a modified Growth plan.

4. Enterprise plan

Enterprise pricing is agreed per contract by Sales (Meera).

Enterprise includes unlimited warehouse locations, single sign-on, a named support manager and a 99.9 percent uptime commitment.

Enterprise proposals must be reviewed by Finance before they are sent.

5. Overage

Shipments above a plan's included amount cost Rs. 4 per shipment.

Rs. 4 is more than double the cost per tracked shipment (about Rs. 1.8 including WhatsApp messages and map lookups) and remains below the overage charged by Trackwise.

Customers must see overage in the dashboard before it appears on an invoice.

6. Annual billing

Annual prepaid plans receive a 15 percent discount on the monthly price.

The annual discount will be reviewed ninety days after launch using the self-serve cohort data.

Annual plans are invoiced once, up front, through Razorpay.

7. Usage meter

The product shows each account's shipments used this month against its plan limit.

A warning banner appears at 90 percent of the plan limit: 1,350 shipments on Starter and 9,000 shipments on Growth.

Owner: Arjun (Engineering). Billing cannot go live without the usage meter.

8. Taxes

All prices are exclusive of GST. GST at 18 percent is added to every invoice.

Kitepost's GST registration must be confirmed before the first self-serve invoice is issued.

9. Refunds and cancellation

Monthly plans can be cancelled at any time and stop at the end of the billing month. Unused shipments do not carry over.

Annual plans can be refunded pro rata within the first 30 days. After 30 days annual plans are not refundable.

10. Support

Starter: email support, first response within one business day.

Growth: email and chat support, first response within four business hours.

Enterprise: named support manager, first response within one hour, around the clock.

11. Launch plan and 12. Worked examples

Self-serve launches on Monday, November 2. The pricing page and FAQ must be final one week before.

Billing plans are set up in Razorpay for monthly and annual Starter and Growth.

Worked example: 2,000 shipments on Starter in one month costs Rs. 4,999 plus 500 x Rs. 4 = Rs. 6,999, before GST.

Worked example: 12,000 shipments on Growth costs Rs. 14,999 plus 2,000 x Rs. 4 = Rs. 22,999, before GST.
